

01-September-2013

OMNI Flow Computers, Inc.

Model 3000 and 6000 Lifecycle Status Statement

1. CURRENT LIFECYCLE STATUS

OMNI 3000 and 6000 flow computers will remain in **Active** Product Manufacturing Status for a period of at least ten (10) years from the date of this Lifecycle Statement.

2. PRODUCT HISTORY

OMNI 3000 and 6000 flow computers have been under a program of continuous improvement since their introduction in 1991. Even though all firmware and hardware modules have been updated several times since their first introduction, most OMNI flow computers produced in the last 23 years can be upgraded to current manufacturing specifications. Using this continuous improvement strategy, OMNI has been able to provide its customers a cost effective project lifetime guarantee through transparent migration paths, without product lifecycle issues or replacement products.

3. SUPPORT AVAILABILITY

OMNI 3000 and 6000 flow computers shall be supported for both hardware and firmware for a period of at least ten (10) years from the date of this notice. Technical Support shall be available for a further period of at least five (5) years beyond any change in manufacturing status.

4. RECOMMENDED USER ACTION

OMNI 3000 and 6000 Users do not need to take any action at this time if their measurement or communications needs have not changed. Users who wish to upgrade to the latest specifications where their technological needs have changed since the installation of their OMNI flow computers or who wish to review the status of their installed OMNI flow computers based on Reliability or Best Practice should contact OMNI.

5. FURTHER INFORMATION

For further information or clarification, please contact OMNI Flow Computers, Inc. or email to: helpdesk@omniflow.com.
